

8060 with optional Pediatric Cover

*The 8040 and 8060 Posey Bed has an optional pediatric cover for children who are at least 46" tall, and weigh at least 46 lbs.*

# PoseyBED™

U.S. Patents #7,047,991 and 7,383,849

Your loved ones deserve the most compassionate and innovative care you can provide. With over 70 years of experience, the Posey Company is a leader in patient protection, fall management and bed safety, and a worldwide manufacturer of high quality healthcare products.

The Posey Bed is a restraint and may be used only by order of a licensed physician. It is not intended to be a substitute for good nursing care and should only be used after all practical non-restraint options have failed.

**8040** – Long Term Care A-Frame Canopy Enclosure

**8060** – All Care A-Frame Canopy Enclosure

**8070** – All-In-One Bed and Canopy Enclosure

## Our Benefits

Thousands of patients have benefited from the Posey Bed worldwide. Patients have freedom of movement within the canopy area, which allows full mobility and range-of-motion within the bed, while helping to provide safety, security and patient well-being. The access panels enable the caregiver to view the patient from all four sides and the patient has a virtually unobstructed view of his/her surroundings.

## When You Need a Little Help

Sometimes, our loved ones need special assistance. Sometimes, as caregivers, you need help providing the most compassionate care.

In the past, direct physical restraints, such as vests or roll belts, were used to help protect patients at risk of a fall from an unassisted bed exit. The cause of these falls are numerous. They include, but are not limited to, Alzheimer's, senile dementia, Huntington's Disease, Sundowners Syndrome, restless sleepers, nocturnal wanderers at-risk for a grave injury from a fall, patients for whom chemical restraints are not appropriate and any other medical condition that would cause the patient to be disoriented and/or physically unstable. Now, when you or the caregiver need help caring for your loved one, a protective environment is available in the Posey Bed.

## An Excellent Solution

The Posey Bed provides an alternative for at-risk patients and may help reduce the need for medications that could further disorient the patient. The Posey Bed is designed for cognitively impaired or agitated patients, patients at risk of injury from a fall or unassisted bed exit, or other symptoms identified by a physician. It also helps provide security to those who have sudden changes in medical condition or mental state, or those who suffer from seizures or spasms.

## "Priceless Peace of Mind"

A testimonial from a patient

"They found a Posey 'safety enclosure' that fits onto my hospital bed (which I already had at home). Now, my husband has priceless peace of mind that allows him to move about the house freely while I'm sleeping, doing all the other things caregivers must do. I don't know how many times I've heard him say, 'that Posey Bed has saved your life and made mine a hundred times easier.' Good people at Posey, THANK YOU!!!"

-Joyce Landorf Heatherly, home care patient and user of the Posey Bed
