

“Shear, Flow... Dynamo”

Promoting Pressure-Relief and Improving
Blood Perfusion

March 3, 2010

11:00 a.m. – 12:30 p.m. Pacific Time
(Q&A to follow lecture)

“Shear, Flow... Dynamo”

Promoting Pressure-Relief and Improving Blood Perfusion

March 3, 2010

11:00 a.m. – 12:30 p.m. Pacific Time
(Q&A to follow lecture)

- At-risk individuals need support surfaces which provide pressure redistribution
- Wound and skin breakdown such as “tunneling” and “under-mining” are caused by shearing
- Management of the “hammock” effect can occur by replacing chair seats with pressure reduction cushions

Panelist/Lecturer

Evan Call, MS

Shear Preventive Interventions

Lab Director at EC Service Inc, Centerville, UT
Adjunct Faculty Weber State University, Dept. of Microbiology
Ogden, UT
